Experience

Troology **Sept 2025 – Present**

Full Stack Developer *On-Site*

- Contributing to the end-to-end development of large-scale government and enterprise-grade applications, ensuring secure system architecture, optimized workflows, and compliance with state-level technical and data-handling standards.
- Worked on the **UPSDMA (Uttar Pradesh State Disaster Management Authority)** project — an NCC training and disaster preparedness platform developed for **SDRF personnel and Aapda Mitra volunteers**. Contributed to the **Rahat Sewa App**, which is **actively used by thousands of users**, building and enhancing core features for training, coordination, and disaster response operations.
- Independently developed a full-scale **Ed-Tech platform (MOOC)** from concept to production, owning the complete development lifecycle including system architecture, backend APIs, frontend implementation, authentication, database design, and deployment.
- Currently working on an **AI-based product — PartIQ**, contributing as a full stack developer by managing both **frontend and backend development**, implementing scalable APIs, and integrating intelligent, data-driven features.
- Building and maintaining scalable applications using the **MERN stack — MongoDB, Express.js, React.js, Node.js, JavaScript, TypeScript**, along with **Tailwind CSS** for modern UI development and RESTful APIs for seamless client-server communication.
- Optimizing system performance by reducing API latency, improving database query efficiency, and enhancing UI responsiveness to ensure high availability and reliability for large user bases.
- Utilizing tools such as **Postman** for API testing, **Git** for version control, and following best practices in API security, scalable backend architecture, and component-based frontend development.

Cognitivo **April 2025 – Aug 2025**

Full Stack Developer *On-Site*

- Integrated multiple **third-party platforms** including **Monday.com** to streamline project management workflows through custom API connectors, webhooks, and automation scripts, improving operational efficiency and cross-team collaboration.
- Implemented **Web Push Notifications** using **Service Workers** and **VAPID keys**, enabling real-time user alerts and significantly improving user engagement and retention.
- Integrated **AI-powered chat functionality (GPT-based)** into applications to support intelligent user interactions, automated responses, and enhanced user experience.
- Designed, built, and optimized end-to-end **RESTful and GraphQL APIs** using **Node.js** and **Express.js**, integrating **PostgreSQL** and **MongoDB** backends, resulting in a **50% increase in concurrent user traffic** without performance degradation.
- Led significant **UI/UX improvements**, refactoring frontend components and enhancing responsiveness, accessibility, and visual consistency across the application.
- Developed scalable and responsive web applications using **React.js, TypeScript, JavaScript, Material UI, and Tailwind CSS**, ensuring clean code architecture, reusable components, and high user satisfaction.
- Collaborated closely with product and design teams to implement new features, fix performance bottlenecks, and deliver production-ready solutions on tight deadlines.

Singularies pvt ltd **March 2024 – March 2025**

Software Engineer *On-Site, Mumbai*

- INtegrating api's and Successfully added new features and designed components for a key product, ensuring seamless integration and enhanced user experience.
- Leveraged TypeScript and Remix frameworks to build robust, maintainable, and scalable web applications, contributing to the overall efficiency and performance of the product
- Utilized a tech stack comprising **React Js**,**TypeScript**, **Remix Framework**, **JavaScript**,**Go** and **Tailwind CSS** to develop responsive, dynamic, and visually appealing web applications, ensuring high code quality and user satisfaction.
- Designed and implemented reusable, accessible, and high-performance components with React.js and Tailwind CSS, ensuring a consistent and polished user experience across the application.

Projects

Twitter-clone **Source Code:Twitter.com**

- Developed a robust backend for a Twitter clone using Node.js and Express, providing functionalities for user authentication, tweet creation, and timeline management.
- **Tech Stack** - HTML, **Postman api**, **MongoDb**, **Express.js**, **Node.js**, **Bcrypt.js**, **jsonwebtoken**,**nodemon** Implemented secure authentication using JWT and password hashing with bcryptjs.
- Integrated features like follow/unfollow, like, and comment, ensuring a seamless user experience and efficient data management.
- Designed and thoroughly tested a comprehensive RESTful API using Postman, ensuring reliable and well-documented endpoints for all user and tweet-related functionalities.

Technical Skills

- **Languages:** C++, C, HTML/CSS, JavaScript,Typescript,Go,C SQL,OOPs Concept,Tailwind CSS
- **Developer Tools:** VS Code, Github, Git,Docker
- **Technologies/Frameworks:** React.js,Redux,MongoDb,Node.Js,Express.js,Postman api

Achievements

- 1st Rank in College on **GeeksforGeeks**
- 3 Star on **LeetCode** 1540 rating top 34 percent
- 1000+ Data Structure and Algorithm Problems Solved on Leetcode and GeeksForGeeks,Codechef
- Longest Streak on **LeetCode**: 831 days

Education

Rajkiya Engineering College Bijnor **2020–2024**
Bachelor of Technology in Electrical Engineering; CGPA: 7.56/10 *Bijnor, India*
Saraswati Vidya Mandir **2019**
Class XII (PCM); Percentage: 79% *Bijnor, India*

Coding Profile

LeetCode **GeeksforGeeks**
